Exchanging volunteer with Nottingham University in two months in Malaysia

LANGUAGES

English

Intermediate

SUMMARY

After I have graduated, I realized that there were so many regretful things which I did not do. However, I was given once chance to begin again as improving other self skills. Those thoughts made me going on learning English and becoming an exchange the volunteers in Malaysia. After that, I got a great experience and even opened up my mind through that trip. My strengths may be not perfet, though I claim that I will overcome whatever I try my best.
