Apply to: Medical Communication Specialist position.

Dear Mr/Ms. Hằng Võ,

I am pleased to find the recruitment of GSK for Medical Communication Specialist vacancies in Mekong Delta on website: pharmalink.vn, I feel that the job description relatively matches with my qualifications and experience.

I have graduated for almost 2 years and earned a Pharmacy Diploma. Recently, I have just stopped working as a sales and administrator at a Clinic in Can Tho which belongs to a joint venture company invested by two Japanese companies. Thanks to the last position, I have completed my working ability step by step ranging from improving communication skills, analyzing and strategic thinking, business planning to the way building net-working.

With my willingness to learn and non-stop full-fill the requirements of the position, I strongly believe that this opportunity would not only give me a chance to deepen my academic knowledge in the inspiring, creative environment of GSK, but also contribute my ability to the attainment of the company.

I really appreciate for taking times to review my documents and hope to have an opportunity to co-operate with the organization this time. For your consideration, kindly notice that I am willing to work in any provinces in the southern of Viet Nam.

I look forward to your positive response.

Yours sincerely,

Tổng Nhật Chân
